Current traction

Menteia KYC — AI identity verification against INE and RENAPO in under 2 minutes, via link, no app, pay per use.

Status

Product in production with a client paying per use. Engine reused in other Menteia products.

Metrics

Indicator	Value	Source
Verifications processed	~950 (as of 06-Oct-2026)	Client audit log
Decisions issued	~718	Client audit log
Time per verification	< 2 minutes	Product
Recurring revenue (with SAVANT)	~US$3,200/month	Menteia team
Clients / brands	1 group / 3 brands	Team

Customers and pilots

- INXEL group: inXel, Jamachulel and XAP (can be named).

Milestones achieved

- Sep-2026: launch and go-live.
- Oct-2026: in-house biometrics, mirror server with failover, Flutter SDK and Chrome extension.
- Binary decision (Approved/Rejected) and signed webhook.

Evidence available for due diligence

- Client verification audit log.
- Public status page.
- API and SDK documentation.

To be documented before pitching

- Update verification counts at end of October.
- Separate KYC revenue from SAVANT revenue.
- Liveness certification (iBeta / ISO 30107-3) and InsightFace commercial license.
- Final privacy notice and rotation of exposed keys.
- Fix the 'In Review' status on the website (decision is now binary).
